Customs and trade compliance

Automate customs filing and clearance to limit U.S. import risk

Complex U.S. trade regulations can slow cross-border freight movements and create risk in your international supply chain. A single oversight leads to downstream costs that affect your bottom line, your customer relationships, and your reputation.

Infios customs and trade compliance digitizes and automates global trade management processes. As a result, you eliminate time-consuming manual tasks and ensure accurate customs filing for shipments entering the United States.

Customs Clearance and Automated Manifest System Filing solutions align with the unique activities of customs brokers, importers, freight forwarders, and NVOCCs.

Embedded features serve functional needs:

- Advanced workflows.
- Document management.
- Business intelligence reporting.

Add-on capabilities offer an expanded platform for enhanced visibility, value-added customs operations, and back-office capabilities.

Features

Document management system
Upload, create, store, and view electronic documents.

- Dashboard view with document search, email, print, and data export.
- Electronic interface to U.S. Customs and Border Protection DIS to automate the processing and submission of required documents.

Advanced workflows
Create lists to manage daily functions using logic-based workflows.

- Define roles with assigned functions for internal users and customers.
- Access datasets from pre-defined data warehouses to select, match, and compare fields.

Report writer
Create, store, and retrieve your defined reports.

- Select files and apply filters to view reports in a user interface with export functionality.
- Schedule reports to email and/or place in a folder for online, secure pickup.

a Körber company

Scalable and secure cloud infrastructure supports open search, outbound emails, and guided summary, entry, and in-bond filings.

Our interactive dashboard consolidates information for easy-to-access decision support. Your comprehensive time-stamped audit trail helps you monitor performance and report to stakeholders.

Customs clearance
Customs Brokers and Importers automate customs clearance and compliance processes for imports entering the United States.

- Automated filing in the Automated Commercial Environment (ACE) for connection to:

  - U.S. Customs and Border Protection.

  - Participating Government Agencies (USDA, FDA, NHTSA, etc.).

- Up-to-date product classifications in Harmonized Tariff Schedules.

- Customer, product, and manufacturing identification reference setup and management.

Automated manifest system filing
Freight forwarders and NVOCCs send air and ocean shipment data to U.S. Customs and Border Protection's Automated Manifest System (AMS) ahead of shipment to keep pace with regulation timelines.

- Collect air and ocean shipment statuses for departure and arrival.

- Submit house bills electronically.

Add-on Modules

- Accounting

- Automated Export System Lite

- Container Tracking

- Duty Drawback

- Foreign Trade Zone Filing (e214)

- PAPS Tracker

- Proforma Invoice

- Reconciliation

- Type 86 Entry Automation

ABOUT INFIOS

Infios provides powerful, intelligent transportation management solutions proven to be a competitive advantage for today's most successful shippers, 3PLs, brokers and carriers. The comprehensive Software-as-a-Service (SaaS) product suite natively supports all transportation modes and segments, generating value for its users through improved cost, productivity and efficiency using artificial intelligence (AI), machine learning (ML) and connected technologies to adapt and automate transportation management functions.
