

ERP SYSTEMS

WMS ERP integration

A fully integrated warehouse management
and supply chain platform that will power up
your ERP and change the game

A high-angle photograph of a worker in a warehouse. The worker is wearing a yellow hard hat and a high-visibility green vest over dark clothing. They are standing on a concrete floor, looking down at a laptop computer. The warehouse environment is visible, with orange metal shelving units and a patterned floor in the background.

- Enhanced data to meet complex customer routing requirements
- eCommerce-specific warehouse capabilities
 - Optimized single unit picking
 - Customer-specific packing slips

Why Infios?

With two decades of dedicated voice experience, we have grown to be the world's largest industrial voice integrator, serving over 1,300 voice customers worldwide. And with the world's most robust AMR capabilities, we implement the best-fit robotics solution tailored to your needs.

We understand that each customer has a different set of circumstances, and pride ourselves on the thorough research we conduct before designing and deploying any solution. Our aim is to be your long-term partner.

We work with you throughout the entire process to ensure every detail of your system works with optimal functionality. And then on an ongoing basis once the system is operational to make sure it is delivering maximum performance. As your business dynamics change, we are on hand to support your changing needs.

Our strengths lie in:

- **Our global presence** with local support wherever you are located
- **Our process knowledge** in integrating voice and AMR solutions
- **Our technology leadership**, with solutions tailored for every company size, sector and use case
- **Our software compatibility**, which integrates with your key host systems
- **Our solutions scalability**, allowing you to keep aligned with the changing needs of your business

CONCLUSION

Your ERP system is the backbone of your business. Infios has thousands of warehousing customers in the mid-market ERP space. Our integration teams will help you minimize implementation time, reduce costs, and provide the peace of mind that your integration is proactively managed.
