

Infios FAP Solutions

Freight audit and payment (FAP) matters today more than ever

Traditional freight audit and payment (FAP) solutions have been helping businesses reduce transportation cost for decades. However, with transportation networks and carrier management becoming ever more complex, they can't comprehensively address the needs of today's shippers. Typical pain points include high transportation cost and overpayments, a lack of visibility into transportation spend, outdated carrier agreements and inefficient transportation networks.

Key benefits

Reduce transportation cost

Improve carrier relationships

Increase visibility

Optimize transportation networks

Boost customer satisfaction

Augment internal teams

Gain control of your transportation spend with our comprehensive, value-added FAP solutions

Our FAP solutions include core FAP capabilities that ensure accurate carrier spending and avoid overpayments, augmented with an industry-leading BI tool providing deep visibility into transportation operations, and a team of dedicated account analysts that extend customer teams. The offering is completed with in-house Transportation Spend Consulting (TSC) to achieve long-term optimization of customers' transportation networks and expenses. The result is a comprehensive FAP offering that addresses the needs of customers with complex transportation networks who are looking to optimize their transportation spend strategically.

Why Infios FAP solutions?

Going beyond traditional FAP

We augment traditional FAP with account analytics, business intelligence and consulting services to achieve long-term optimization of customers' transportation cost and operations.

Proven, global solutions

Our mature FAP offering covers all modes of transportation with global reach (Infios operations in 10 countries, 165+ currencies transacted).

Extensive FAP expertise

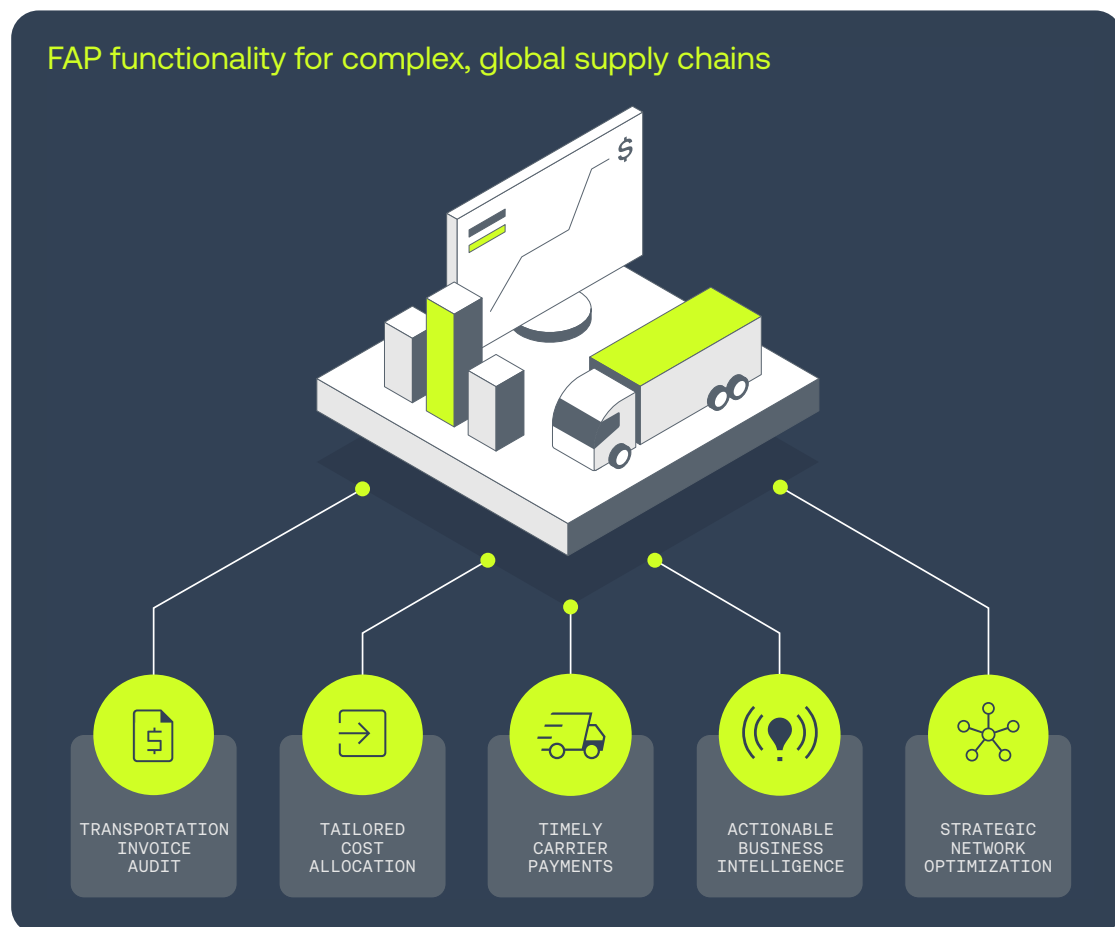

Infios has been a trusted FAP partner since 2002, with deep transportation industry experience and a long-tenured team.

How it works

Optimizing transportation spend management holistically provides benefits beyond cost reduction

Our proven FAP solutions enable customers to address their transportation spend challenges:

- **Reduce transportation cost** by avoiding overpayments, improving cash flow and simplifying spend management.
- **Raise operational efficiency** through automating manual payment and audit processes and leveraging Infios account analysts to extend internal teams.
- **Improve carrier relationships** with carrier management tools that foster close collaboration and allow you to become a “shipper of choice”.
- **Boost customer satisfaction** by improving service levels, enhancing shipment visibility and controlling delivery cost.

Better together

Infios FAP solutions and Infios TMS

Our FAP solutions can be seamlessly integrated with Infios or 3rd party TMS. This enables customers to plan and manage their transportation networks and shipments all across modes and regions, while our FAP solutions help optimize the associated transportation spend.
